SKILLS

Languages: Java, JavaScript, TypeScript, Dart, Python, SQL

Frameworks & Libraries: Spring Boot, React, Flutter, Next.js, Node.js, Express, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, Firestore, Redis, pgvector

Cloud & DevOps: Google Cloud Platform (GCP), Amazon Web Services (AWS), Firebase, Docker, GitHub Actions, Supabase

AI / ML: RAG, Vector Embeddings, LLM Tool Calling, OpenCV, Gemini API, OpenAI API, Claude API, LangChain

Tools: Git, Linux, Postman, Jira, Claude Code

WORK EXPERIENCE

Graduate Teaching Assistant | Northeastern University

Sep 2024 - Apr 2025

- Mentored and supported 200+ graduate students across two semesters in Java, Data Structures, Algorithms, and Software Architecture through code reviews, grading, and one-on-one debugging sessions.

Software Engineer | Tata Consultancy Services

Jun 2022 - Jan 2024

- Cut API latency by 20%** (500→400 ms) on Spring Boot microservices serving up to 5K req/min via caching and load balancing.
- Reduced **release cycle** from **4 weeks to 3 weeks** across 3 microservices by automating build and deployment workflows using Docker and Jenkins.
- Cut query execution time by 30%** (1,000→700 ms) for enterprise simulation tools by restructuring SQL queries and adding targeted indexes.

Freelance Software Engineer | Rawat Soap and Chemicals

Jan 2022 - Apr 2022

- Built and shipped a cross-platform inventory app (Flutter, Firestore) deployed to shop-floor devices, replacing paper-based stock logging and **cutting processing errors by 50%**.
- Reduced material wastage** by 42%, **saving** an estimated **\$15K annually**, by implementing real-time raw materials **tracking** with Firestore data sync.
- Automated** daily consumption, wastage, and stock-valuation **reports** (PDF/CSV) with Cloud Scheduler and Cloud Functions, saving 5 hr/week of manual reconciliation.

PROJECTS

ClickDrobe | AI Wardrobe & Styling Application clickdrobe.com

Feb 2026 - Present

Flutter, PostgreSQL, Supabase, Gemini API

- Built a cross-platform Flutter application that transforms clothing photos into structured wardrobe items using Gemini vision, enabling outfit planning, wear tracking, and personalized styling.
- Engineered an asynchronous PostgreSQL ingestion pipeline with row-level locking and recovery sweeps; consolidated garment processing by source photo, reducing processing-function calls by **73% in a measured workload**.
- Reduced image payload by ~99%** (110 MB → 1 MB) for a 109-item wardrobe grid through thumbnail generation, JPEG compression, and migration of existing images.
- Developed a Gemini-powered styling assistant with **11 callable tools**, parallel tool execution, and Server-Sent Events streaming for wardrobe search, weather-aware recommendations, and trip planning.

LinkFlow | Full-Stack Link Management & URL Shortener [GitHub](https://github.com)

Sep 2025 - Nov 2025

React, TypeScript, Node, MongoDB, Vite

- Built a full-stack URL shortening platform using TypeScript, Express, MongoDB, and React, featuring HTTP 302 redirects benchmarked below **50 ms**, click telemetry, real-time search filtering, and dynamic QR code generation.
- Containerized the multi-tier architecture using multi-stage Docker builds and Docker Compose with an Nginx reverse proxy, automating testing and build verification via GitHub Actions CI pipelines.

RAG-based AI System for Document Understanding and Search

Feb 2025 - May 2025

Google Gemini Pro, LangChain, FAISS, FastAPI, NLTK

- Designed and built a Retrieval-Augmented Generation (RAG) system for contextual document search, leveraging FAISS vector retrieval with Gemini Pro for answer generation.
- Integrated LangChain and Hugging Face models to improve semantic search precision by 40%, with backend APIs deployed via FastAPI for scalable access.

EDUCATION

Northeastern University, Boston, MA

Jan 2024 - Dec 2025

Master of Science, Computer Science | GPA 3.7/4

Medicaps University, Indore, India

Aug 2018 - May 2022

Bachelor of Technology, Computer Science

ACTIVITIES

Google Developer Group on Campus & University Tech Club

Jan 2025 - Dec 2025

President

- Led student organizations serving 80+ developers and organized 3 workshops on AI-assisted development, AI agents, and cloud technologies.

CERTIFICATIONS & AWARDS

• **Certifications:** Google Cloud Professional Cloud Developer | GitHub Foundations

• **Awards:** Ranked 1st (Start Summit Hackathon) and 2nd (Roux Institute Hackathon) at Northeastern University.
