

Jaynesh Bhandari

San Jose, CA | +1 (207) -313-7210 | thejaynesh@gmail.com | [LinkedIn](#) | github.com/thejaynesh | jaynesh.dev

SKILLS

- **Languages:** Java, TypeScript, JavaScript, Dart, Python, SQL
- **Frameworks & Libraries:** Spring Boot, React, Next.js, Flutter
- **Databases:** PostgreSQL, MySQL, MongoDB, Firestore, Redis, pgvector
- **Cloud & DevOps:** Google Cloud Platform (GCP), Amazon Web Services (AWS), Firebase, Docker, GitHub Actions, Jenkins
- **AI / ML:** RAG, Vector Embeddings, LLM Tool Calling, Gemini API, OpenAI API, Claude API
- **Tools:** Git, Linux, Postman, Jira

WORK EXPERIENCE

Northeastern University

Sep 2024 - Apr 2025

Graduate Teaching Assistant

Boston, MA

- Supported **200+ graduate students across two semesters** of Programming Design Paradigm and Algorithms through office hours, technical activities, code reviews, grading, and one-on-one debugging support.
- Mentored students in Java, data structures, algorithm design, software architecture, and debugging through code reviews and one-on-one technical guidance.

Tata Consultancy Services

Jun 2022 - Jan 2024

Software Engineer

- Improved API response times by **20%** (500ms → 400ms) for a telecom client's backend handling **5,000+ daily requests**, by optimizing **Java/Spring Boot** microservices with query caching and load balancing.
- Reduced release cycle from **4 weeks to 3 weeks** across 3 microservices, by automating build and deployment workflows using **Docker and Jenkins**.
- Improved database query execution time by **30%** (1,000ms → 700ms) for enterprise client workloads, by restructuring queries and adding targeted indexes on internal simulation tools.

Rawat Soap and Chemicals

Jan 2022 - Apr 2022

Freelance Software Developer

- Built and shipped a cross-platform inventory app (Flutter, Firestore) deployed to shop-floor devices, replacing paper-based stock logging and **cutting processing errors by 50%**.
- **Reduced material wastage** by 42%, **saving** an estimated **\$15K annually**, by implementing real-time raw materials **tracking** with Firestore data sync.
- Built **automated report generation** (Cloud Scheduler → Cloud Functions) producing daily consumption, wastage, and stock-valuation summaries as PDF/CSV, **saving 5 hrs/week** of manual reconciliation.

EDUCATION

Northeastern University

Jan 2024 - Dec 2025

Master of Science, Computer Science

Boston, MA

- **GPA:** 3.7/4.0

Medicaps University, Indore, India

Aug 2018 - May 2022

Bachelor of Technology, Computer Science

Indore, India

PROJECTS

ClickDrobe | AI Wardrobe & Styling Application clickdrobe.com

Apr 2026 - Present

Flutter, PostgreSQL, Supabase, Gemini, pgvector

- Built a cross-platform Flutter application that transforms clothing photos and share-sheet imports into structured wardrobe items using Gemini vision, enabling outfit planning, wear tracking, and personalized styling.
- Engineered an asynchronous PostgreSQL ingestion pipeline using row level locking, event-driven workers, and recovery sweeps, processing approximately **15-30 garments/minute** and reducing worker invocations by **73%**.
- Diagnosed invalid outfit combinations caused by free-text garment labels and introduced a canonical taxonomy shared across ingestion, recommendations, backfills, and evaluation tooling.

AlgoView | Algorithm Visualizer [Algoview.jaynesh.dev](https://algoview.jaynesh.dev)

React, TypeScript, Zustand, Web Workers, Vite, Firebase

- Built a browser-based **teaching platform** that visualizes **19 algorithms across five categories**, using execution-state snapshots to support play, pause, scrubbing, and backward navigation with synchronized pseudocode and complexity analysis.
- Developed a benchmarking engine that executes real sorting algorithms in background workers across varying input sizes and plots empirical runtime curves against theoretical Big-O while keeping the interface responsive.

ACTIVITIES

Google Developer Group on Campus & University Tech Club

Jan 2025 - Dec 2025

President

- Led a student organization serving 80+ developers and organized 3 workshops on AI-assisted development, AI agents, and cloud technologies.

AWARDS

- Ranked 1st (Start Summit Hackathon) and 2nd (Roux Institute Hackathon) at Northeastern University.

CERTIFICATION

- Google Cloud Professional Cloud Developer
- GitHub Foundations
